

Overview software providers e-invoicing

Version 3.12.2025

Disclaimer: this is a non-exhaustive list of around 15 providers that we put together based on a number of the following parameters:

° price and offer: free and/or inexpensive entry-level version (aiming for a maximum 10 euro/month for a basic package)

° all packages support both sending, receiving and processing e-invoices

° available in Dutch, French and English

Danspunt has no privileged partnership with any of these providers.

Get a clear picture of your situation (e.g. monthly number of invoices) and with that in mind you can decide which package best suits your needs

Please note: the prices can change due to e.g. temporary free trial periods and variable promotional rates. Make sure you check the latest updates for each tool on the company's website.
